

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Characterization of alanine/valine mutants of the CB2R including expression levels, E_{max}, and pEC₅₀ for G_{ai2} and βarr₁ and classified coupling profile.

File name: Supplementary Data 2

Description: Contact frequencies of each simulated mutant per replicate.

File name: Supplementary Data 3

Description: Transmission information computed as degeneracy for 35 simulated mutants.

File name: Supplementary Data 4

Description: BRET response scores of the simulated mutants.
